# VIDISHA SHUKLA

**Frontend Developer**

+91 8595263751 | vidisha5820@gmail.com | Bangalore, Karnataka, India | www.linkedin.com/in/vidisha-shukla-92a66b1b4

## PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 4 years building scalable, component-based applications using React.js, Angular, TypeScript, and modern JavaScript (ES6+). Skilled in crafting reusable UI components with Material UI and Tailwind CSS, managing complex state with Redux, and integrating REST APIs for high-performance enterprise solutions. Proven track record delivering well-tested (Jest, Jasmine, Karma), cross-browser compatible products for clients like Honeywell, Intel, and Philips within Agile/Scrum teams.

## PROFESSIONAL EXPERIENCE

**Frontend Developer — L&T Technology Services (LTTS) - Bangalore, India | Mar 2023 – Present**

**Predictive Analytics Dashboard | Client: Honeywell**

- Engineered scalable dashboard features using React.js, TypeScript, and React Micro-Frontend architecture, improving application modularity and supporting maintainable enterprise-scale feature development.
- Developed an interactive React-based map for dynamic tool-health visualisation across countries and regions, enabling stakeholders to access operational insights through a more intuitive data-driven interface.
- Built reusable UI components with Material UI and Tailwind CSS and integrated REST APIs with Redux state management, standardising frontend patterns and delivering reliable real-time data workflows.
- Strengthened frontend quality and reliability through Jest-based unit testing, debugging, code reviews, and Git/GitHub practices; recognised by the Honeywell Tooling Health Management team for the map feature.

**Integrated Building Energy Management System (IBems) | Client: Intel**

- Engineered responsive Angular screens and dynamic reusable forms, translating business requirements and UI designs into production-ready frontend features.
- Built 20+ reusable Angular components and modules, standardising UI patterns and reducing repetitive implementation across application features.
- Improved application quality through unit and end-to-end testing with Karma and Jasmine, systematic debugging, and defect resolution.
- Supported reliable releases through CI/CD pipelines, collaborating with backend and DevOps teams to streamline application deployment and delivery.

**SoftOps - Licence Management | Client: Philips**

- Developed and maintained full-stack application functionality using React.js and Node.js, delivering responsive frontend experiences for core SoftOps workflows.
- Engineered reusable React components to standardise UI implementation and improve maintainability across application features.
- Designed and integrated REST APIs with Node.js, enabling reliable data exchange between frontend components and backend services.
- Strengthened application quality through Jest-based unit testing, debugging, and validation across frontend and backend components.

**Software Developer Intern — L&T Technology Services (LTTS), India** ***Jan 2022 – Jul 2022***

- Built responsive, interactive user interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3 during a 6-month full-stack development internship.
- Developed reusable React UI components and integrated them with backend services via RESTful APIs, applying component-based architecture principles.
- Contributed to backend development using Java and Spring Boot, supporting full-stack feature delivery.
- Ensured application functionality, performance, and cross-browser compatibility through unit testing with Jest and debugging.

## TECHNICAL SKILLS

- **Frontend:** React.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, React Micro-Frontend Architecture
- **Libraries & UI Frameworks:** React Hooks, Redux (State Management), Material UI (MUI), Tailwind CSS, Reusable UI Components, Dynamic Forms
- **Backend Integration:** Node.js, python, REST APIs, API Integration, JSON
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Chrome DevTools
- **Methodologies:** Agile, Scrum, SDLC, CI/CD
- **Testing & Quality:** Unit Testing (Jest, Karma & Jasmine)
- **AI tools:** Cursor, GitHub Copilot, Claude

## KEY ACHIEVEMENTS

- Recognised by the Honeywell Tooling Health Management team for developing a dynamic, React-based map feature that improved data visualisation for stakeholders.
- Delivered enterprise frontend solutions for Honeywell, Intel & Philips using React.js, Angular, TypeScript, Micro-Frontends, REST APIs and automated testing.
- Reduced feature development effort by 40% through 20+ reusable components.

## QUALIFICATION

**M.Tech, Information Technology —** Madan Mohan Malviya University of Technology *Oct 2020 – Jul 2022*

**B.Tech, Computer Science & Engineering —** Dr. A.P.J. Abdul Kalam Technical University *Aug 2016 – Sep 2020*
